

## Paperback Reinforcement

Extend the life of your paperbacks!

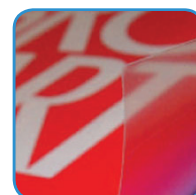

Paperbacks typically have a limited circulation. But you can make them last longer with fast, easy, and affordable bindery options from Brodart. Books are processed quickly and shipped with the rest of your order—no special orders or shipments required.

Choose from three options.

### BrodartGuard

*Paperback reinforced with laminate to increase circulation durability.*

The single-piece laminate includes a 2-mil spine section to allow flexibility in movement. The high-quality, clear material and non-yellowing adhesive allow cover art to shine through.

### BrodartConvert

*Paperbacks transformed into hardcovers for little more than the cost of a paperback.*

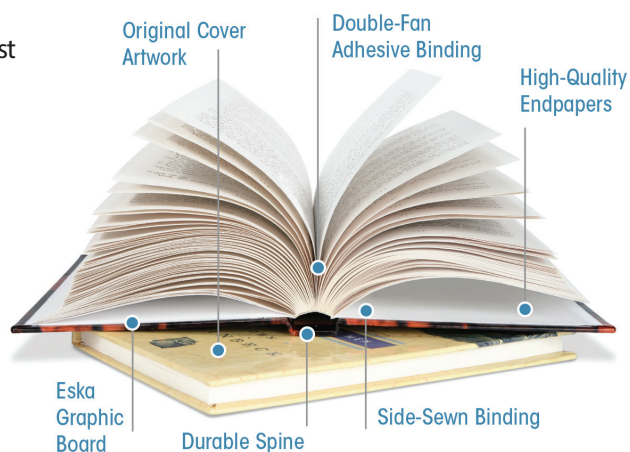

The process uses the original paper cover of books at least 1/4" thick, laminated onto heavy binder board, and rebound with strong, permanently flexible glue.

### BrodartBound

Brodart offers this format through Turtleback, which provides the highest level of reinforcement in the industry. These paperbacks come with a lifetime guarantee on workmanship and materials. BrodartBound-Sewn and BrodartBound-Glued replace the publisher's original binding. The publisher's colorful, illustrated paperback cover is scanned, digitized, and reprinted to produce new cover sheets that are wrapped around heavy hardback board.

Turtleback's growing collection of titles contains over 8,000 popular titles: picture books, beginning readers, chapter books, middle grade, YA, graphic novels, juvenile nonfiction, literature, adult fiction, adult nonfiction, reference, and Spanish.

### OUR GUARANTEE

If you are dissatisfied with the quality of material or workmanship, you can return any Brodart pre-bind to us for replacement or repair, as long as the title is available from the publisher.
